Personal Profile

I am a student of Computer Science at the Silesian University of Technology at the AEI faculty. I am a kind of protagonist. I have knowledge in working in Scrum team. I quickly adapt to changes. I am a hardworking positive person who is always looking for the best solutions. I can work under pressure. I love to spend my free time reading a lot of non-fiction books, going out with friends and of course programming. I am involved in projects outside of studies. Green belt in karate kyokushin.

About my projects

My visitcard website:

I created this website for portfolio's purposes with HTML, CSS3 and JavaScript technology.

FlappyBird with Python:

This project was made to understand pygame library and basics of creating games in Python

Wektor:

My first objective program that I fully created by myself in C++ technology. It implements linear vector class with methods and overloaded operators.

Pharmacy:

Actually I am working at pharmacy management OOP program. My work is still in progress.
